PROFILE

Junior Data Analyst with practical skills in Excel, SQL, Python and Power BI, with hands-on experience analysing, cleaning and visualising data through end-to-end portfolio projects. Skilled in data analysis, data validation, relational databases, dashboard development and translating findings into clear business recommendations. Analytical and detail-oriented, with a strong interest in using data to solve business problems and support evidence-based decision-making.

TECHNICAL SKILLS

- Data Analysis: Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Data Validation, Trend Analysis, KPI Reporting
- Excel: Pivot Tables, Pivot Charts, Formulas, Data Cleaning, Data Analysis, Dashboard Development
- SQL: Joins, CTEs, Subqueries, Aggregations, Window Functions, Relational Databases, SQLite
- Python: pandas, matplotlib, Data Cleaning, Data Analysis, Data Visualisation
- Power BI: DAX, Data Modelling, Interactive Dashboards, KPI Development, Data Visualisation
- Data & BI: ETL/ELT Concepts, Business Intelligence, Data Quality, Business Reporting

DATA ANALYTICS PROJECTS

Coffee Shop Sales Analysis | Excel

- Analysed 149,116 transactions to evaluate revenue, store performance, product categories and purchasing patterns.
- Used PivotTables, formulas, data cleaning and validation techniques to calculate KPIs including \$698K total revenue, 214K units sold and \$4.69 average transaction value.
- Built an Excel dashboard to visualise monthly, store, product, weekday and hourly sales performance.

Coffee Shop Sales Analysis | SQL & Python

- Designed a normalised SQLite relational database and analysed transaction data using SQL and Python.
- Wrote 12 analytical SQL queries using joins, CTEs, subqueries and window functions to analyse revenue trends, product rankings, store performance and pricing.
- Used Python, pandas and matplotlib for data analysis and visualisation, identifying key patterns in peak sales periods and product performance.

Coffee Shop Sales Dashboard & Business Analysis | Power BI

- Developed an interactive Power BI dashboard using DAX, KPI cards, slicers and Top N analysis to monitor sales performance across stores, products and time periods.
- Identified that 36.7% of revenue was generated between 8–10 AM, providing evidence for staffing and operational recommendations.
- Translated analytical findings into business recommendations covering staffing, merchandising, growth planning and data quality.

Portfolio: sindy290.github.io/sindy290-data-portfolio/

PROFESSIONAL EXPERIENCE

Orion Engineered Carbons

Quality Laboratory Technician

Port Elizabeth, South Africa | May 2026 – Present

- Collect, validate and maintain operational and quality data, ensuring accuracy and data integrity for reporting.
- Analyse results to identify trends, deviations and process variations that support root cause investigations.
- Collaborate with production and quality teams to investigate issues and provide evidence-based recommendations.
- Maintain accurate records and support continuous improvement through reliable data and reporting.

ADDITIONAL PROFESSIONAL EXPERIENCE

Blue Bubbles Manufacturing

Laboratory Analyst

Johannesburg, South Africa | Jun 2024 – Oct 2024

- Analysed and validated operational data from 100+ manufacturing batches, identifying trends and anomalies.
- Performed data cleaning and statistical analysis to support operational decision-making.
- Communicated analytical findings to cross-functional teams and supported process improvements that increased product consistency by approximately 20%.

Axalta Plascon (Pty) Ltd

Laboratory Technician

Port Elizabeth, South Africa | Jan 2023 – Dec 2023

- Analysed formulation and production data to identify inconsistencies and support operational decisions.
- Performed data validation checks and translated results into insights supporting quality and production improvements.

Alfred Nzo Water & Sanitation Municipality

Plant Operator Intern

Matatiele, South Africa | Jul 2022 – Dec 2022

- Collected and validated operational data to support water treatment processes.
- Analysed trends and anomalies in water quality data and supported performance and regulatory reporting.

EDUCATION & CERTIFICATIONS

ExploreAI Academy

National Certificate: Data Analytics | Sept 2025 – May 2026

- SQL • Microsoft Excel • Power BI • Data Visualisation • Statistics • Business Intelligence • Dashboard Development

ExploreAI Academy

National Certificate: Information Systems (Data Engineering) | May 2026 – Present

- Data Engineering Fundamentals • ETL/ELT • Data Pipelines • Data Warehousing • Data Modelling • Data Quality & Validation • Python • Cloud Data Concepts

Walter Sisulu University

Advanced Diploma in Chemistry | 2024

Walter Sisulu University

Diploma in Analytical Chemistry | 2020 – 2023
